

Sensoneo is one of the finalists of the Via Bona award

Bratislava, 14th of February 2016

Sensoneo, a leading provider of smart enterprise-grade waste management solutions, was nominated for Via Bona award in Green company category.

Via Bona, prestigious awards organized by Pontis Foundation that are recognizing companies and associations for doing business responsibly, has entered its 17th year. 71 companies from Slovak republic have registered to six different categories of prestigious Via Bona awards. Judging committees selected twenty companies that will move forward to the finale.

Sensoneo solution for smart waste management became one of the finalists in the Green Company category, which is an award that Pontis Foundation delivers to companies that have implemented extraordinary and inspirational project or activities dedicated to improvement of environment.

The jury appreciated that Sensoneo solution strives to achieve the goal “Let’s collect the waste, not the containers” and that the solution enables to collect the waste based on real requirements. Decrease of the waste collection routes and pickups required for disposal of waste is consequently reflected to remarkable time and cost savings as well as positive impact on environment and wellbeing of people.

Finale of Via Bona 2016 will take place on 4th of April in Bratislava’s Stara Trznica.

Sensoneo is a global enterprise-grade smart waste management solution provider that enables cities and businesses to manage their waste cost-efficiently, be more environmentally responsible and improve the well-being of people.

Through its unique smart waste management technology, Sensoneo is redefining the way waste is managed. The solution combines unique ultrasonic Smart Sensors (Single, Double, Quatro and patent-pending Micro-sensors) that monitor waste real-time with sophisticated software (Smart Analytics, Smart Route Planning and Smart Waste Management System) providing cities and businesses with data-driven decision making, and optimization of waste collection routes, frequencies and vehicle load. This results in overall waste collection cost reduction of at least 30% and carbon emission reduction up to 60% in cities.

Sensoneo smart waste management has attracted cities and business around the world and the solution is installed in numerous locations across Europe, North America, South America, Middle East, Australia and New Zealand.
