

## Sensoneo received Mission Award for tackling important social challenges

Bratislava, 4<sup>th</sup> of December, 2017

**Sensoneo, a leading provider of smart enterprise-grade waste management solutions, received prestigious Mission Award that recognizes companies working on innovations tackling a social challenge. The award was delivered during the Future Now 2017 conference.**

Three inspiring companies were nominated for an award that appreciates the efforts and contribution to important social challenges. Corvus is a developer of set of applications that makes touchscreen Android phones accessible for blind and visually impaired users. Mentegram is global provider of mental health software and solutions.

The jury made of experienced entrepreneurs, country managers and philanthropists concluded to award Sensoneo – global provider of smart waste management solution that enable to manage the waste cost-efficiently, improve environment and wellbeing of people.

“We are very happy to receive this award. Smart solutions have real potential to revolutionarily change the current approach to the waste management and bring more efficiency and environmental consideration to the whole process. We love that our solution combines positive environmental impact with great business case. We believe this is the key that helps Sensoneo to thrive and succeed globally,” said Lubos Tuma, CEO at Sensoneo.

The award was delivered during Future Now conference, which took place on 1.12.2017 in National Theater in Bratislava. Future Now is one day annual conference, where innovators, investors and business leaders come to address tech-driven transformation of today’s world.

***Sensoneo is a global enterprise-grade smart waste management solution provider that enables cities and businesses to manage their waste cost-efficiently, be more environmentally responsible and improve the well-being of people.***

*Through its unique smart waste management technology, Sensoneo is redefining the way waste is managed. The solution combines unique ultrasonic Smart Sensors (Single, Double, Quatro and patent-pending Micro-sensors) that monitor waste real-time with sophisticated software (Smart Analytics, Smart Route Planning and Smart Waste Management System) providing cities and businesses with data-driven decision making, and optimization of waste collection routes, frequencies and vehicle load. This results in overall waste collection cost reduction of at least 30% and carbon emission reduction up to 60% in cities.*

*Sensoneo smart waste management has attracted cities and business around the world and the solution is installed in numerous locations across Europe, North America, South America, Middle East, Australia and New Zealand. For more information about how Sensoneo can help you manage your waste smarter, please visit [www.sensoneo.com](http://www.sensoneo.com).*
